

## TDT'S PRESCHOOL OF USELESS KNOWLEDGE

Weque For Dummies Special Needs Edition

It's been brought to our attention that some of you (actually only one of you but we're not naming any names, **C A R L**) may be finding the work of this semester too... let's say... "challenging". To prevent any self esteem issues for our short bus riding student & in keeping with Pressbox Production's No PBPer Left Behind policy, we've decided to offer a single remedial crash course.

Michigan is one of the 50 United States of America.

Michigan looks like a mitten (look at the back of your left hand, **NO** not that one, your other left hand).

A long, long time ago it was very, very cold in Michigan.

There was lots & lots of ice & dinosaurs.

Then it got warm & the ice melted into 5 really big puddles.

We call them the Great Lakes.

Then some Indians lived there.

Lots & lots of time passed then people built cottages at the very top of Michigan.

More time passed & Dharma & Greg often visited one of those cottages.

In a very short time we are all going to Michigan.

Once upon a time Michigan had lots of copper.

Then somebody took most of it, wonder who?

The End.
